Knowledge Manager

Description

Our Organization requires the service of a Knowledge Manager.

Responsibilities

- Encouraging a culture of knowledge sharing and collaborative work flow among departments and project teams.
- Ensuring that employees are sure of the knowledge management process including the purpose of doing so.
- Making sure that the right knowledge goes to the right people, and that this information is promptly applied to business activities.
- Helping capture new knowledge with the usage of a knowledge management system.
- Monitor progress and learning processes by keeping track of engagement, project outcomes and other metrics.
- Providing relevant coaching, training and support to champion a knowledge management culture.

Qualifications

- Possess a Bachelor's Degree from an accredited educational institution.
- Demonstrate experience in designing and developing computer-based training modules, 5 years minimum.
- Demonstrate experience in analyzing petroleum logistics support for emergency, contingency, and wartime operations, 5 years minimum.
- Demonstrate experience in implementing KM policies, processes, procedures, and standards, 5 years minimum.
